### Types of Grant Programs

NIH uses activity codes (e.g. R01, R43, etc.) to differentiate the wide variety of research-related programs we support. NIH Institutes and Centers (ICs) may vary in the way they use activity codes; not all ICs accept applications for all types of grant programs or they apply specialized eligibility criteria. Look closely at Funding Opportunity Announcements (FOAs) to determine which ICs participate and the specifics of eligibility.

A comprehensive list of extramural grant and cooperative agreement activity codes is available, or you can search for specific codes below:

Search Activity Codes:  (e.g. R01, P01, T, K, F, etc.) Reset

Search All Text:  (e.g. Mentored, Training, etc.)

Select from List:  Go x

The following groupings represent the main types of grant funding we provide:

- Research Grants (R series)
- Resource Grants (various series)
- Career Development Awards (K series)
- Trans-NIH Programs
- Research Training and Fellowships (T & F series)
- Inactive Programs (Archive)
- Program Project/Center Grants (P series)

### FIND THE RIGHT "HOME"

**Manuscript Matcher** x

Manuscript Matcher helps you find the most related journals for your manuscript. It works best when your title has at least 10 words and your abstract has at least 100 words. Using this information, it will pull the most relevant keywords for matching.

Please enter your manuscript information below.

Title

The manuscript title or relevant portion of the title. This works best with at least 10 words.

Abstract

The manuscript abstract or relevant portion of the abstract. This works best with at least 100 words.
